Discover our IoT solutions and
find one that suits you

The Rocket NG Solution Finder makes it easy to find, configure and order the right IoT solution for you. In addition to lots of information about the solutions and their applications, you can also see live sensor data for the respective solution in the app and explore your new solution in detail in advance!

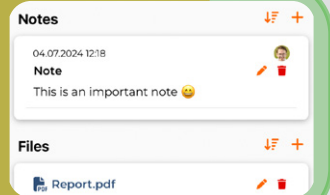

Manage all your projects for free with our APP

Our app allows you to create and manage as many projects as you want.
 So you can start digitalising your projects today for free and easily expand them later with measurement data.

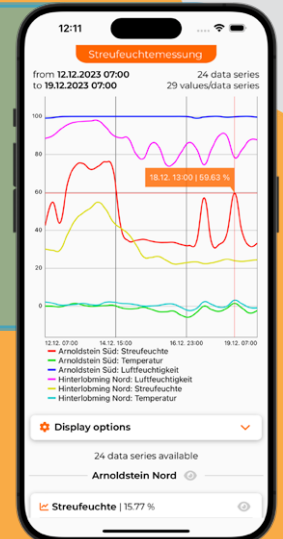

Document your projects with photos

Keep an overview with notes, files and manage locations

Analyse your sensor data, compare and share it with others

More Top-Features

-  Receive ongoing updates with great new features
-  Stay informed with our news
-  Share your projects
-  Integrated support function
-  Personalise your app-experience via the settings

Install our app now, explore IoT Solutions and use it to manage your projects for free.
